INDEX OF AUTHORS VOLUME 17

A

Afzelius, B. A. *See* Dallai and Afzelius 561
Akin, D. E. *See* Aldrich, Ferl, Hils and Akin 341
Aldrich, H. C., Ferl, R. J., Hils, M. H. and Akin, D. E. Ultrastructural correlates of anaerobic stress in corn roots 341
Anderson, M. *See* Briggs, Chaffee and Anderson 923
Azuma, M. and Yamashita, O. Cellular localization and proposed function of midgut trehalase in the silkworm larva, *Bombyx mori* 539

B

Barni, S., Bernocchi, G. and Gerzeli, G. Morpho-histochemical changes in hepatocytes during the life cycle of the European eel 97
Basch, P. F. *See* Popiel, Irving and Basch 69
Barrett, J. *See* Wharton and Barrett 79
Beg, N. *See* Hamburger, Reid, Pelle, Breth, Beg, Ryan and Cines 451
Berdan, R. C. and Shivers, R. R. Filipin-cholesterol complexes in plasma membranes and cell junctions of *Tenebrio molitor* epidermis 177
Bernocchi, G. *See* Barni, Bernocchi and Gerzeli 97
Binnington, K. C. Ultrastructural changes in the sheep blowfly, *Lucilia* induced by certain insecticides and biological inhibitors 131
Bosabalidis, A. M. A possible new mode of dictyosome duplication in plant cells 279
Bowman, P. D. *See* Shivers, Bowman and Martin 417
Bowser, S. S., McGee-Russell, S. M. and Rieder, C. L. Phagotrophy in foraminifera: examination of the digestive apparatus of two allogromiids by light and high voltage electron microscopy 823
Brasch, K. *See* Jensen and Brasch 117
Breth, L. A. *See* Hamburger, Reid, Pelle, Breth, Beg, Ryan and Cines 451
Briggs, R. T., Chaffee, J. E. and Anderson, M. Calcium-containing granules in myoepithelial cells of the polychaete *Syllis spongiphila:* Possible ionic modulators 923
—, *See* Labato and Briggs 889
Brooker, B. E. *See* MacKenzie, Brooker and Forsyth 39
Brown, J. W. *See* Hilfer, Rayner and Brown 523
Brown, M. R., Raikhel, A. S. and Lea, A. O. Ultrastructure of midgut endocrine cells in the adult mosquito, *Aedes aegypti* 709

C

Camatini, M. *See* Franchi and Camatini 13
Cardell, R. R., Jr. *See* Dimlich and Cardell 293
Caulfield, J. P. *See* Samuelson and Caulfield 667
Chaffee, J. E. *See* Briggs, Chaffee and Anderson 923
Chatterjee, A. *See* Corbeil, Chatterjee, Foresman and Westfall 53
Chiang, R. G. and Steel, C. G. H. Ultrastructure and distribution of identified neurosecretory terminals in the sinus gland of the terrestrial isopod *Oniscus asellus* 405
Cines, D. B. *See* Hamburger, Reid, Pelle, Breth, Beg, Ryan and Cines 451
Clarke, G. D. *See* Koffer, Daridan and Clarke 147
Coltoff-Schiller, B. *See* Goldfischer, Coltoff-Schiller and Goldfischer 441
Corbeil, L. B., Chatterjee, A., Foresman, L. and Westfall, J. A. Ultrastructure of cyclic changes in the murine uterus, cervix and vagina 53

D

Dallai, R., Luporini, P. and Salvatici, P. Plasma membrane specialization at the discharge site of the excretory pore-less vacuole of the ciliate *Euplotes raikovi* 309
—, and Afzelius, B. A. Membrane specializations in the paired spermatozoa of dytiscid water beetles 561
Daridan, M. *See* Koffer, Daridan and Clarke 147
Dauber, J. H. *See* Rinaldo, Henson, Dauber and Henson 461
Davis, W. L. *See* Jones and Davis 111

INDEX OF SUBJECTS VOLUME 17

A

α-amanitin, effects of, on the fine structure of adrenal fasciculata cells in the young rat 27
α-lactalbumin 39
Actin, in normal and polyoma virus transformed cultured (BHK) cells 147
—, in spreading fibroblasts of glial cells 649
Adrenal, fasciculata cells, effects of α-amanitin on 27
Alveolitis, neutrophilic, role of alveolar macrophages in endotoxin-induced 461
Amphibia, frogs, *Bombina* and *Xenopus*, development and ciliation of the palate in 853
Anabiosis, recovery from, in the plant parasitic nematode, *Ditylenchus* 79
Anaerobiosis, ultrastructural correlates of, in corn roots 341
Annelid, polychaete, *Syllis spongiphila*, myoepithelial cells in 923
Annular pad, in avian lens 359
Antibodies, monoclonal, for human endothelial cells 171
—, reactive with endothelial cells, isolation and characterization of 451
Antigens, reactive with endothelial cells 451

B

Bacillus thuringiensis, crystal endotoxin, effect of sublethal, on the larval midgut of a moth 379
Basal apparatus, ciliary, adaptation of, to cell shape changes in a contractile epithelium 321
Basal lamina, from insect tissues, a new technique for the isolation and purification of 287
— —, in malignant schwannoma 699
— —, insect, formation of 511
— —, of midgut, a simple mechanical method to isolate 763
BHK cells, normal and polyoma virus transformed 147
Birds, lens fiber organization in four avian species: SEM study 359
Blood-brain barrier, of adult cockroach CNS 141
— —, bovine 417

C

Ca^{2+} chelator, and a calmodulin blocker interfere with the structure of inter-Sertoli junctions 13
Calcium-containing granules in myoepithelial cells of the polychaete *Syllis spongiphila:* possible ionic modulators 923
Calcium, role of in nematocyst discharge 199
Calmodulin, blocker, and a Ca^{2+} chelator interfere with the structure of inter-Sertoli junctions 13
Carcinoma cells, and fibroblasts, shape changes and polarization of, when migrating through tissue 491
Cholesterol, -filipin complexes in plasma membranes and cell junctions 177
Chromatin, in hepatocytes 97
Chorion, covalent crosslinking of proteins of, involves endogenous hydrogen peroxide 553
Cilia, in the fetal and neonatal canine retina 335
Cilia, of miracidia of *Schistosoma mansoni* 667
—, of the palate of two frogs, *Bombina* and *Xenopus*, development of 853
Ciliary necklace, in the fetal and neonatal canine retina 335
Circulatory system, bovine brain endothelial 417
— —, microfibrils, elastic anchoring components of extracellular matrix, are associated with fibronectin in the zonule of Zinn and aorta 441
— —, varicose veins as a source of adult human endothelial cells 171
Coelenterate, changes in the distribution of filament-containing septate junctions in myoepithelial cells of 1
—, *Hydra*, neurons isolated from 161
—, hydromedusae, the fibrous system of the extracellular matrix of 811
—, sea anemone, *Metridium senile*, adaptation of a ciliary basal apparatus to cell shape changes in a contractile epithelium of 321
—, ultrastructure of nematocyst discharge in catch tentacles of the sea anemone *Haliplanella luciae* (Cnidaria: Anthozoa) 199
Collagen, gels, ultrastructural features of bovine mammary epithelial cells grown on 39
—, in the extracellular matrix of hydromedusae 811
—, long spacing, ultrastructural study, in malignant schwannoma 699
Compound 48/80 293
Computer graphics, reconstruction, of phagotrophy in Foraminifera 823
— —, An HVEM study of serial thick sections: shape changes and polarization of cells migrating through tissue 491
Connective tissue, insect, formation of 511
Contractile vacuole, of the ciliate *Euplotes raikovi*, plasma membrane specialization at the discharge site of 309
Copulatory apparatus, male, in an opisthobranch mollusc, *Runcina* 215
Crosslinking, covalent, of chorion proteins 553
Crustacean, isopod, *Oniscus asellus* 405
Cryptobiosis, recovery from, in the plant parasitic nematode *Ditylenchus*, ultrastructural changes during 79

Crystal endotoxin, of *Bacillus thuringiensis*, effect of sublethal, on the larval midgut of a moth, *Manduca:* SEM study 379
Cuticle, insect, sclerotin and lipid in the waterproofing of 227
—, of the sheep blowfly, *Lucilia*, ultrastructural changes in, induced by insecticides and biological inhibitors 131
—, silver and golden, fine structure and development of, in butterfly pupae 745
—, the transfer of lipid in insects from the epidermal cells to 249
Cuticular cavities: storage chambers for cyanoglucoside-containing defensive secretions in larvae of a zygaenid moth 267
Cuticulogenesis, correlated with ultrastructural changes in oenocytes and epidermal cells in the late cockroach embryo 723
Cyanoglucosides, defensive secretions in larvae of a zygaenid moth 267
Cytochalasin-D, 417
Cytoskeleton, in normal and polyoma virus transformed cultured (BHK) cells 147

D

Desmosomes, of intercalated discs of mammalian heart 605
Dictyosome, duplication, in plant cells, a possible new mode of 279
Digestive system, a simple mechanical method to isolate the basal lamina of insect midgut epithelial cells 763
— —, cellular localization and proposed function of midgut trehalase in the silkworm larva *Bombyx mori* 539
— —, effect of sublethal *bacillus thuringiensis* crystal endotoxin treatment on the larval midgut of a moth, *Manduca:* SEM study 379
— —, the fine structural morphology of the midgut of adult *Drosophila:* a morphometric analysis 883
— —, ultrastructure of midgut endocrine cells in the adult mosquito, *Aedes aegypti* 709
Digestive tract, of the parasitic nematode *Trichinella*, freeze-fracture study of 189
Digitonin, differential lysis of plasma membrane and granules of human neutrophils by 793

E

Ecdysone, and nucleolar cycles during the 5th stadium in *Manduca* epidermis 349
Ecdysteroid, hemolymph, nucleolar necklace formation in response to 589
—, in morphogenesis in wing imaginal discs 473
Elastic tissue 441
—, collagen reticulum, of mouse peritoneum, studies of carcinoma cells and fibroblasts migrating through 491
Embryo, cockroach, cuticulogenesis correlated with ultrastructural changes in oenocytes and epidermal cells in 723
Endocrine cells, midgut, in the adult mosquito, *Aedes aegypti* 709
Endocuticle, fine structure and development of, in butterfly pupae 745
Endoplasmic reticulum, effects of anaerobic stress in corn root 341
— —, morphometric analysis of, in hepatocytes from rats subjected to anaphylactic shock 293
Endothelial cells, adult human, varicose veins as a source of 171
—, isolation and characterization of monoclonal antibodies reactive with 451
Endotoxin, -induced neutrophilic alveolitis in rats, role of alveolar macrophages in 461
Epicuticle, of insects 227, 249
Epidermal cells, cuticulogenesis correlated with ultrastructural changes in, in the late cockroach embryo 723
— —, of an insect 901
Epidermal feet, the structure of, during their development 901
Epithelial cells, mammary, grown on collagen gels 39
Epithelium, contractile, adaptation of a ciliary basal apparatus to cell shape changes in a 321
Excretory system, elaborations of the basal surface of the cells of the malpighian tubules of an insect 865
Extracellular matrix, morphogenesis in wing imaginal disks; its relationship to changes in 473
Eye, lens fiber organization in four avian species: a scanning electron microscope study 359

F

Fasciculata cells, adrenal, effects of α-amanitin on 27
Fat body, locust, nuclear development in 117
Fibers, of lens, in four avian species 359
Fibroblasts, affiliation of large numbers of, with larval muscle fibers 511
—, spreading, the arrangement of microfilaments and microtubules in the periphery of 649
Fibronectin, microfibrils are associated with, in the zonule of Zinn and aorta 441
Fibrous system, in the extracellular matrix of hydromedusae 811
Filament, -containing septate junctions 1
Filipin 417
—, -cholesterol complexes, in plasma membranes and cell junctions of *Tenebrio molitor* epidermis 177
Fish, European eel, morphohistochemical changes in hepatocytes, during the life cycle of 97
Flagella, in paired spermatozoa of dytiscid water beetles 561
Follicle cells, of *Drosophila melanogaster* 553
Foraminifera, digestion of prey in: correlation of light microscopic, cytochemical and HVEM techniques 823
Freeze-fracture, of cilia in the fetal and neonatal canine retina 335
— —, filipin-cholesterol complexes in plasma membranes and cell junctions of *Tenebrio molitor* epidermis 177
— —, glial cell contacts in insects: effects of feeding on intercellular junctions 841

— —, intercalated discs of mammalian heart: a review of structure and function 605
— —, membrane specializations in the paired spermatozoa of dytiscid water beetles 561
— —, plasma membrane specialization at the discharge site of the excretory pore-less vacuole of the ciliate *Euplotes raikovi* 309
— —, role of pleated septate junctions in the epithelium of miracidia of *Schistosoma mansoni* during transformation to sporocysts *in vitro* 667
— —, study of the digestive tract of the parasitic nematode *Trichinella* 189
— —, the mammalian spermatozoon: a model for the study of regional organization and function 769

G

Gland, rat thyroid, cytochemical localization of hydrogen peroxide generating sites in 889
Glia, of adult cockroach CNS 141
Glial cells, and fibroblasts, the arrangement of microfilaments and microtubules in the periphery of 649
— cell contacts, in insects: effects of feeding on intercellular junctions 841
Glycocalyx, in paired spermatozoa of dytiscid water beetles 561
Glycogen, in rat hepatocytes 293
Golgi cisternae, a possible new mode of dictysome duplication in plant cells 279

H

Hemidesmosomes, in malpighian tubules 287
—, of *Tenebrio molitor* epidermis 177
Hemolymph, ecdysteroid peaks, nucleolar necklace formation in response to 589
Hepatocytes, from rats subjected to compound 48/80-induced anaphylactic shock 293
—, morphohistochemical changes in, during the life cycle of the European eel 97
Hormone, ecdysone, and nucleolar cycles 349
—, ecdysteroid, in morphogenesis of wing imaginal discs 473
—, juvenile, influence of, on nuclear development in locust fat body 117
—, nucleolar necklace formation in response to hemolymph ecdysteroid peaks 589
Host-parasite relationships 53
HVEM, a computer graphic study of serial thick sections 491
—, study of phagotrophy in allogromiid Foraminifera D
Hydra, SEM of neurons isolated from the pedal disk and body column of 161
Hydrogen peroxide, -generating sites in the rat thyroid gland, cytochemical localization of 889
Hydromedusae, the fibrous system of the extracellular matrix of 811

I

Imaginal discs, wing, morphogenesis in: its relationship to changes in the extracellular matrix 473
Insect, a simple mechanical method to isolate the basal lamina of insect midgut epithelial cells 763
—, CNS, organ culture of 141
—, cuticle, sclerotin and lipid in the waterproofing of 227
—, cuticulogenesis correlated with ultrastructural changes in oenocytes and epidermal cells in the late cockroach embryo 723
—, effect of sublethal *Bacillus thuringiensis* crystal endotoxin treatment on the larval midgut of a moth, *Manduca:* SEM study 379
—, egg-shell of *Drosophila melanogaster* III, Covalent crosslinking of the chorion proteins involves endogenous hydrogen peroxide 553
—, elaborations of the basal surface of the cells of the malpighian tubules of an insect 865
—, fat body, nuclear development in: the inflluece of juvenile hormone on inclusion bodies and the nuclear matrix 117
—, fine structure and development of the silver and golden cuticle in butterfly pupae 745
—, *Manduca*, nucleolar cycles during the 5th stadium in epidermis of 349
—, membrane specializations in the paired spermatozoa of dytiscid water beetles 561
—, midgut, of adult *Drosophila*: a morphometric analysis 883
—, morphogenesis in wing imaginal disks: its relationship to changes in the extracellular matrix 473
—, nucleolar necklace formation in response to hemolymph ecdysteroid peaks 589
—, sheep blowfly, *Lucilia*, ultrastructural changes in, induced by insecticides and biological inhibitors 131
—, silkworm larva, *Bombyx mori*, cellular localization and proposed function of midgut trehalase in 539
—, *Tenebrio molitor*, filipin-cholesterol complexes in plasma membranes and cell junctions of epidermis 177
—, the colon of *Leucophaea maderae:* fine structure and physiological features of 395
—, the fine structural morphology of the midgut of adult *Drosophila:* a morphometric analysis 883
—, the fire ant, *Solenopsis*, blocking of insemination-induced flight muscle histolysis by leupeptin 111
—, the pairing of nucleolar patterns in an epithelium as evidence for a conserved nuclear skeleton 573
—, the structure of epidermal feet during their development 901
—, tissues, a new technique for the isolation and purification of the basal lamina from 287
—, transfer of lipid in, from the epidermal cells to the cuticle 249
—, ultrastructure of midgut endocrine cells in the adult mosquito, *Aedes aegypti* 709
—, zygaenid moth, cuticular cavities: storage chambers for cyanoglucoside-containing defensive secretions in larvae of 267
—s, glial cell contacts in: effects of feeding on intercellular junctions 841
Insecticides, ultrastructural changes in the cuticle of the sheep blowfly, *Lucilia*, induced by 131

Intercalated discs, of mammalian heart: a review of structure and function 605
Intercellular junctions, in coelenterate myoepithelial cells (also see *Junctions*) 1
— —, assembly, a model for synthesis and 417
Interference reflector, multilayer, in silver and golden cuticle in butterfly pupae 745
Ion transport, in colon of *Leucophaea maderae* 395
Isopod, terrestrial, *Oniscus asellus*, ultrastructure and distribution of identified neurosecretory terminals in the sinus gland of 405

J

Junctions, intercalated discs of mammalian heart: a review of structure and function 605
—, intercellular, effects of feeding on, in insect glial cells 841
— —, in coelenterate myoepithelial cells 1
—, inter-Sertoli, evidence that a Ca^{2+} chelator and a calmodulin blocker interfere with the structure of 13
—, pleated septate, role of, in the epithelium of miracidia of *Schistosoma mansoni* 667
—, septate and gap, in *Tenebrio molitor* epidermis 177
—, septate, in colon on *Leucophaea maderae* 395
—, septate, in digestive tract of parasitic nematode *Trichinella* 189
—, septate, myoepithelial cells, in coelenterate 1
—, tricellular, between intestinal cells in nematode 189
Juvenile hormone, influence of, in nuclear development in locust fat body 117

L

Lamellar bodies, in fetal mouse lung 523
Lens, fiber organization in four avian species: SEM study 359
Leupeptin, protease inhibitor, blocks insemination-induced flight muscle histolysis in the fire ant, *Solenopsis* 111
Lipid, of sebaceous gland 683
Liver, morphohistochemical changes in hepatocytes during the life cycle of the eel 97
—, morphometric analysis of hepatocytes from rats subjected to 48/80-induced anaphylactic shock 293
Lung, fetal mouse, mesenchymal control of branching pattern in 523

M

Macrophages, alveolar and role of in endotoxin-induced neutrophilic alveolitis in rats 461
Malpighian tubule, isolation and purification of basal lamina of 287
—s, elaborations of the basal surface of the cells of 865
Mastocytoma cells, tumor minicells: single, large vesicles released from 801
Matrix, extracellular, in hydromedusae 811
Mesenchymal, effect of, on specialization of respiratory epithelium in fetal mouse 523
Mesogloea, of hydromedusae, fibrous system in 811
Microfibrils, elastic anchoring components of the extracellular matrix, are associated with fibronectin in the zonule of Zinn and aorta 441
Microfilaments, in normal and polyoma virus transformed cultured (BHK) cells 147
—, and microtubules, the arrangement of, in the periphery of spreading fibroblasts and glial cells 649
Microtubule, and microfilaments, arrangement of, in the periphery of speading fibroblasts and glial cells 649
—, array, around nematocyst capsule 199
Mid body, 573
Midgut, insect, a simple mechanical method to isolate the basal lamina in epithelial cells of 763
—, larval, of a moth, effect of sublethal *Bacillus thuringiensis* crystal endotoxin on 379
—, trehalase, in the silkworm larva *Bombyx mori*, cellular localization and proposed function of 539
—, ultrastructure of endocrine cells of, in the adult mosquito *Aedes aegypti* 709
Migration, of cells through tissue: a HVEM and computer graphic study of serial thick sections 491
Minicells, tumor: single, large vesicles released from cultured mastocytoma cells 801
Miracidia, of *Schistosoma mansoni*, role of pleated septate junction in the epithelium of 667
Mitochondria, effects of anaerobic stress on, in corn roots 341
—, morphometric analysis of hepatocytes from rats subjected to compound 48/80-induced anaphylactic shock 293
Mitosis, in an insect epithelium 573 & 589
—, in *Manduca* epidermis 349
Mollusc, *Runcina*, the male copulatory apparatus in 215
Morphometric analysis, of hepatocytes from rats subjected to compound 48/80-induced anaphylactic shock 293
Morphometry, hepatocytes from rats subjected to compound 48/80-induced anaphylactic shock 293
—, of the midgut of adult *Drosophila* 883
Muscle, cardiac, intercalated discs of: a review of structure and function 605
—, degeneration, in the fire ant *Solenopsis* 111
—, fibers, larval, affiliation of large numbers of fibroblasts with 511
—, flight, histolysis of, blocked by leupeptin 111
—, of esophagus of parasitic nematode *Trichinella* 189
—, papillary, human 441
Myocardium, mammalian 605
Myoepithelial cell, coelenterate 321
—s, of the polychaete *Syllis spongiphila*, calcium-containing granules in 923

N

Nematocyst, discharge, in catch tentacles of the sea anemone *Haliplanella* 199
Nematode, *Ditylenchus*, ultrastructural changes during the recovery of, in 79
—, parasitic, *Trichinella*, freeze-fracture study of digestive tract of 189
Nervous system, central, of adult cockroach, organ cul-

ture of: ultrastructural and physiological characteristics of 141
— —, glial cell contacts in insects: effects of feeding on intercellular junctions 841
— —, SEM of neurons isolated from the pedal disk and body column of *Hydra* 161
Neurons, isolated from the pedal disk and body column of *Hydra* 161
Neurosecretory terminals, identified, ultrastructure and distribution of, in the sinus gland in terrestrial isopod *Oniscus asellus* 405
Neutrophils, human, differential lysis of plasma membrane and granules of, by digitonin 793
—, migration of 461
Nuclear skeleton, conserved, pairing of nucleolar patterns in an epithelium as evidence for 573
Nucleolar cycles, during the 5th stadium in *Manduca* epidermis 349
—, necklace formation, in response to hemolymph ecdysteroid peaks 589
—, patterns, the pairing of, in an epithelium as evidence for a conserved nuclear skeleton 573
Nucleus, in locust fat body: the influence of juvenile hormone in inclusion bodies and the nuclear matrix 117

O

Oenocyte, cuticulogenesis correlated with ultrastructural changes in, in the late cockroach embryo 723
Organ culture, of adult cockroach CNS: ultrastructural and physiological characteristics 141
Oxytalan, 441

P

Palate, development and ciliation of, in two frogs *Bombina* and *Xenopus:* A comparative study 853
Pedal disk, and body column of *Hydra,* SEM of neurons isolated from 161
Phagotrophy, in two allogromiid Foraminifera: a correlation of light microscopic, cytochemical and HVEM technics 823
Plant cells, a possible new mode of dictyosome duplication in 279
—, ultrastructural correlates of anaerobic stress in corn roots 341
Plasma membrane, specialization, at the discharge site of the excretory poreless vacuole of *Euplotes raikovi* 309
— —, basal, elaborations of in cells of the malpighian tubules of an insect 865
— —, organization and function, in mammalian spermatozoon 769
— —, and granules of human neutrophils, differential lysis of, by digitonin 793
Platyhelminth, *Schistosoma mansoni,* wound healing in 69
Pneumocyte, type II, in fetal mouse lung 523
Polarization, and shape changes, of cells migrating through tissue: a HVEM and computer graphics study of serial thick sections 491
Polychaete, *Syllis spongiphila,* myoepithelial cells of 923
Pore canals, in insect cuticle 249
Protease inhibitor, leupeptin, blocks insemination-induced flight muscle histolysis 111
Protozoa, ciliate, *Euplotes raikovi,* plasma membrane specialization at the discharge site of the excretory poreless vacuole of 309
—, digestion of prey in Foraminifera is not anomalous: a correlation of light microscopic, cytochemical and HVEM technics to study phagotrophy in two allogromiids 823

R

Reproductive system, inter-Sertoli junctions 13
— —, membrane specializations in the paired spermatozoa of dytiscid water beetles 561
— —, the egg shell of *Drosophila melanogaster* III. Covalent crosslinking of the chorion proteins involves endogenous hydrogen peroxide 553
— —, the male copulatory apparatus in an opisthobranch mollusc, *Runcina* 215
— —, the mammalian spermatozoon: a model for the study of regional specificity in plasma membrane organization and function 769
Retina, canine, cilia in the fetal and neonatal 335
Ribosome, precursor granules in 5th stadium *Manduca* epidermis 349

S

Schistosoma mansoni, role of pleated septate junctions in the epithelium of 667
Schwannoma, malignant, ultrastructural study of long spacing collagen fibres and basal lamina in 699
Sclerotin, and lipid in the waterproofing of the insect cuticle 227 & 249
Sebaceous gland, comparative studies of the ultrastructure of 683
Sebocyte, comparative studies of the ultrastructure of 683
Secretions, defensive, cyanoglucoside-containing 267
Sinus gland, of the terrestrial isopod, *Oniscus asellus,* ultrastructure and distribution of identified neurosecretory terminals in 395
Spermatozoa, paired, of the dytiscid water beetles, membrane specializations in 561
Spermatozoon, mammalian: a model for the study of regional organization and function 769
Sporocysts, role of pleated septate junctions in the epithelium of miracidia of *Schistosoma mansoni* during transformation to 667
Stereometry (see *Morphometry, Morphometric analysis*)
Striated rootlet, ciliary, in a coelenterate contractile epithelium 321
Surfactant, in fetal mouse lung 523

T

Thyroid, rat, cytochemical localization of hydrogen peroxide-generating sites in 889

Tissue culture, arrangement of microfilaments and microtubules in the periphery of spreading fibroblasts and glial cells 649
— —, isolation and characterization of monoclonal antibodies reactive with endothelial cells 451
— —, of bovine brain endothelial cells 417
— —, regulation of the microfilament system in normal and polyoma virus transformed cultured (BHK) cells 147
— —, shape changes and polarization of cells migrating through tissue. A HVEM and computer graphics study of serial thick sections 491
— —, tumour minicells: single, large vesicles released from cultured mastocytoma cells 801
— —, ultrastructural features of bovine mammary epithelial cells grown on collagen gels 39
— —, varicose veins as a source of adult human endothelial cells 171
Transepithelial potential, in the colon of *Leucophaea maderae* 395
Trematode, *Schistosoma mansoni*, role of pleated septate junctions in the epithelium of miracidia of *Schistosoma mansoni* during transformation to sporocysts *in vitro* 667
Tumor minicells, single large vesicles released from cultured mastocytoma cells 801
